GITHUB

By Karlita Andrea Flores Rodríguez

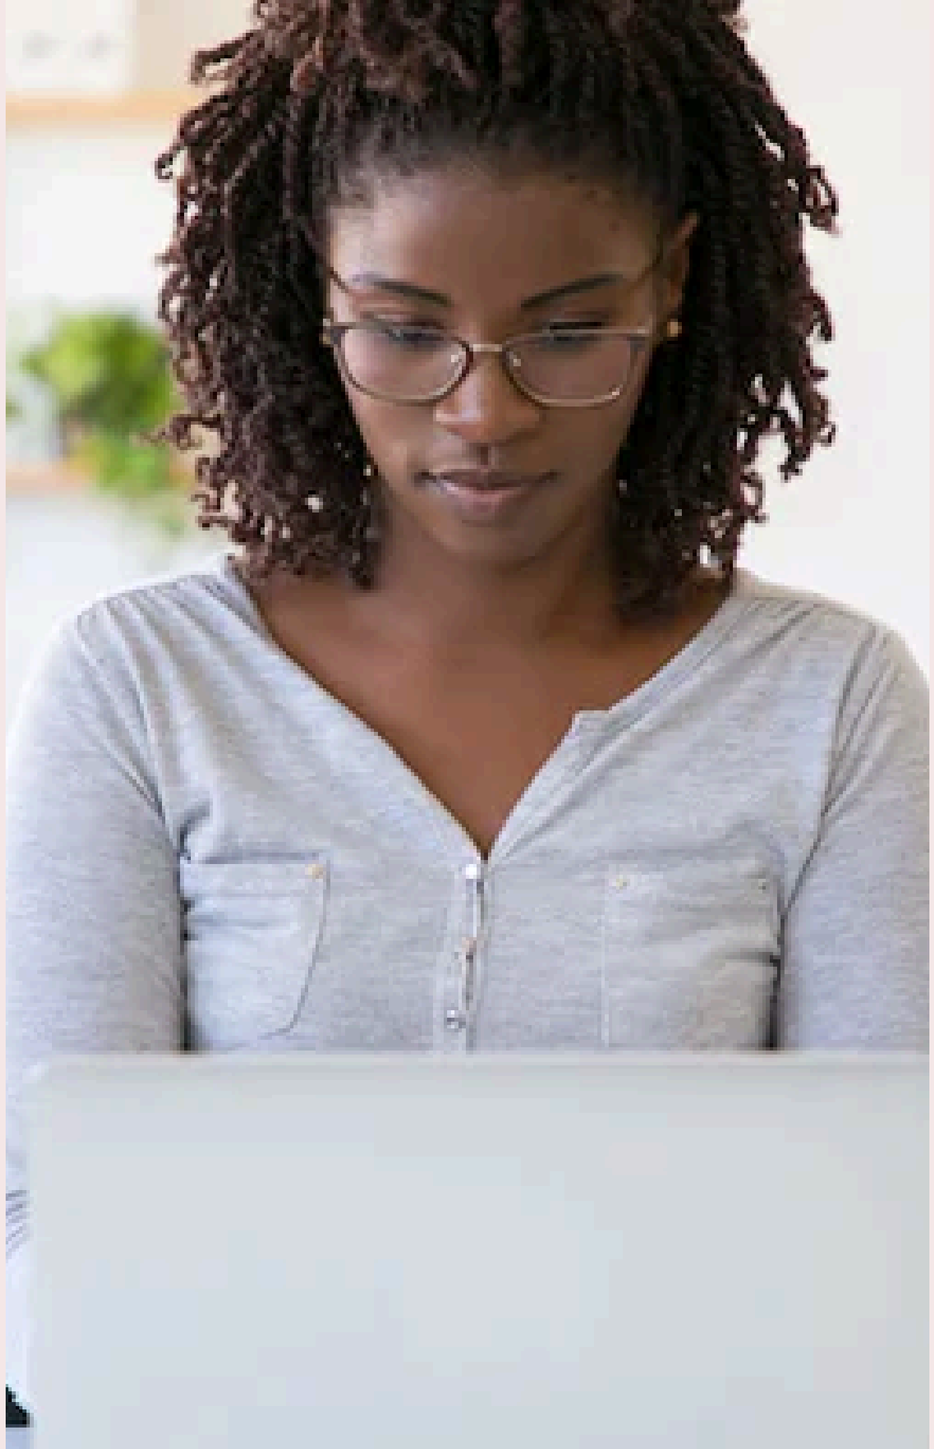
What is it?

It is like a folder where you can save your work, which works with different software versions

HISTORY

GitHub

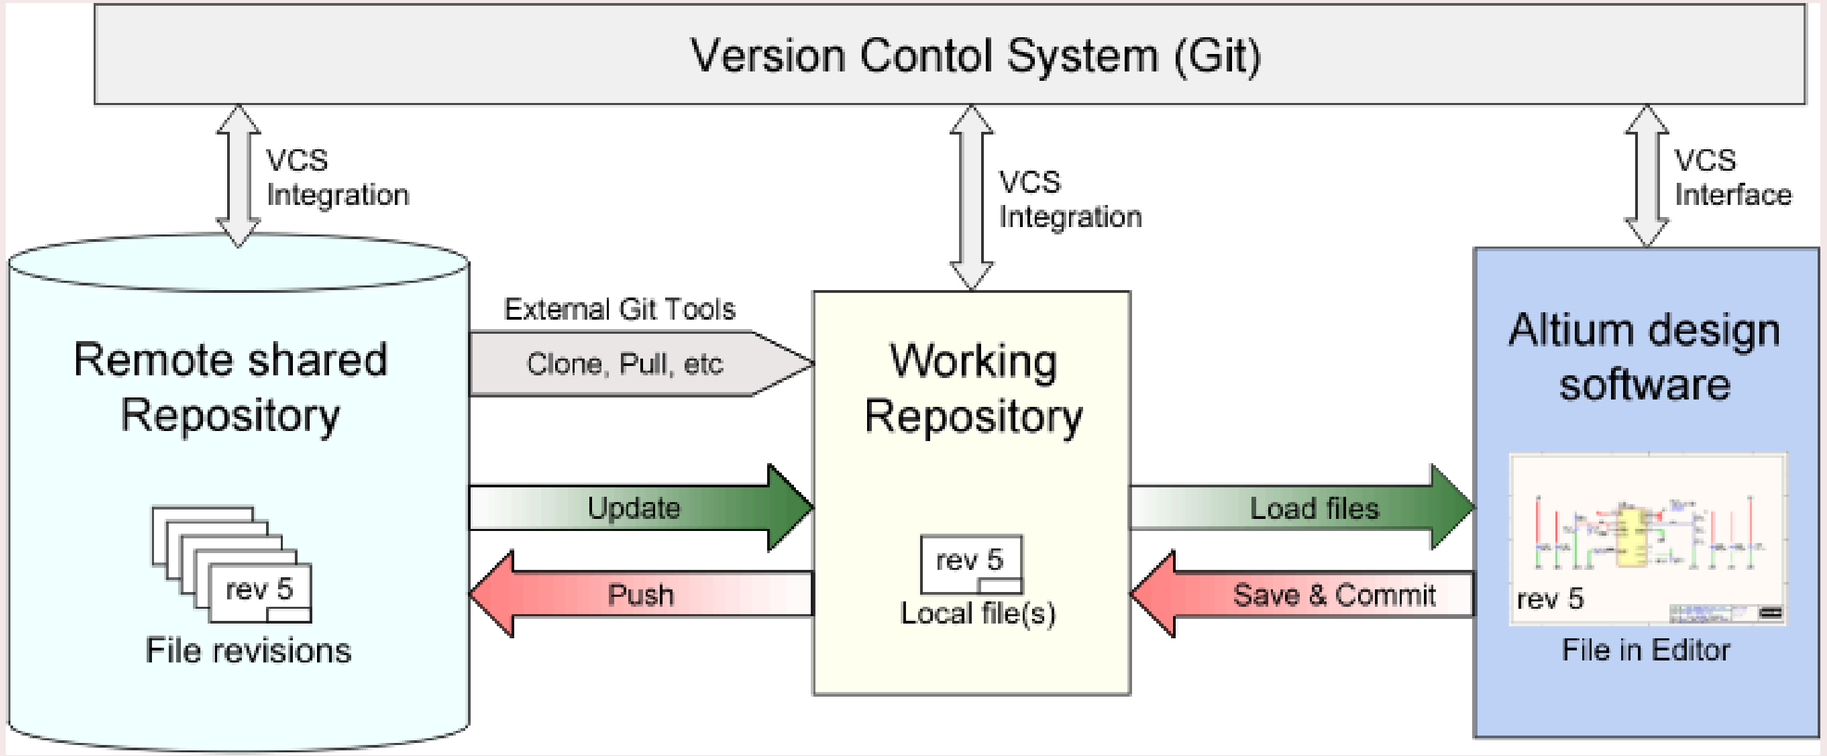
It was created in 2008 in the city of San Francisco, USA. It was created because people were still using software programs at that time, and he wanted to do something new and innovative, so he created GIT, but years later he called it “GITHUB”.



WHAT IS IT FOR?

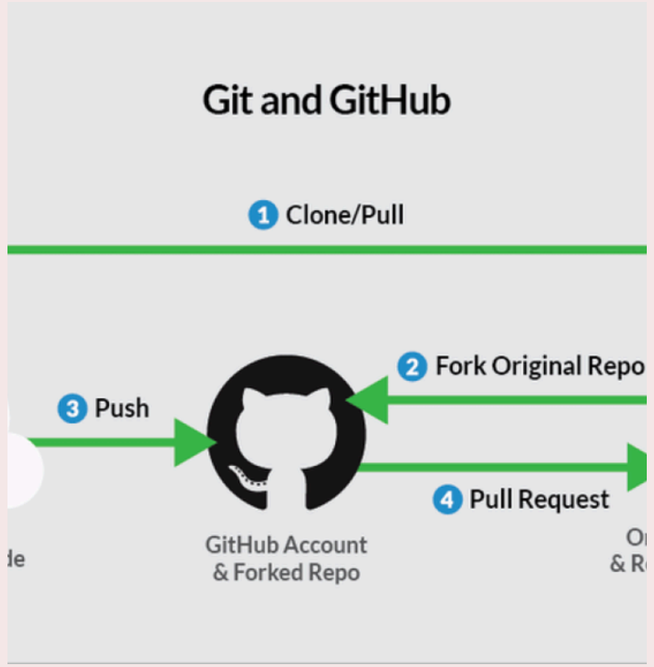
It is used to store jobs, and you can modify it whenever you want.

HOW IS IT WORKS?



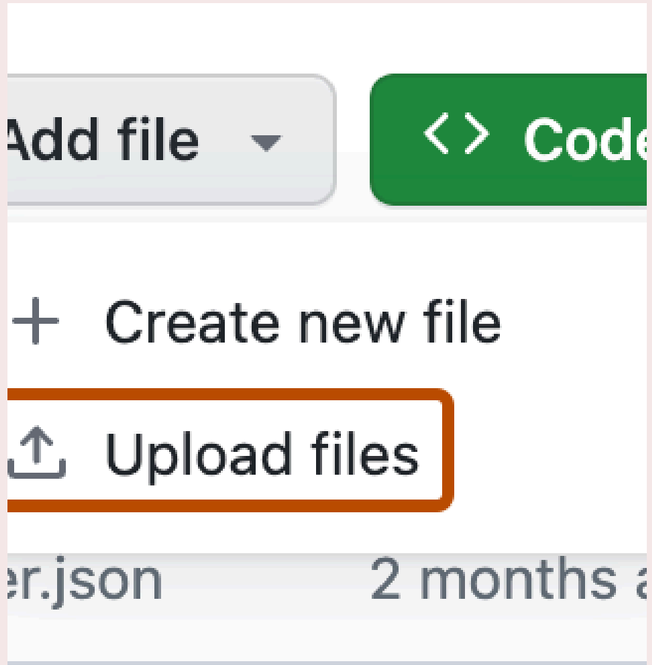
HOW TO CREATE A REPOSITORY

1. In the upper right corner of any page, select and then click New repository.
2. Type a short and easy to remember name for the repository. For example: "hello-world".
3. Optionally, you can add a description of the repository. For example, "My first repository on GitHub".
4. Choose the visibility of the repository.
5. Select Initialize this repository with a README
6. Click on Create repository..



HOW TO UPLOAD A FILE IN YOUR REPOSITORY

1. Navigates to the main page of the repository.
2. Above the list of files, select the drop-down list menu
3. Upload files
4. Click on Add files



Thank you
